

## **CytoID** CELL LINE AUTHENTICATION (STR)

<b>SAMPLE TYPE</b>	<b>TEST CODE</b>	<b>INCLUDES MYCOPLASMA SPP.</b>
Human 9 STR marker profile: Interspecies contamination check for human, mouse, rat, African green monkey, and Chinese hamster	<b>HSTR9</b>	<b>HSTM9</b>
Human 16 STR marker profile: Interspecies contamination check for human, mouse, rat, African green monkey, and Chinese hamster	<b>HST16</b>	<b>STM16</b>
Mouse genetic profile using NIST published 9 species-specific STR markers: Interspecies contamination check for human, mouse, rat, African green monkey, and Chinese hamster	<b>MSTR9</b>	<b>MSTM9</b>
Rat genetic profile using NIST published 31 species-specific STR markers: Interspecies contamination check for human, mouse, rat, African green monkey, and Chinese hamster	<b>STR31</b>	<b>STM31</b>
